## Regulatory monitoring *at scale*

Seqlense DOC continuously collects, indexes and tracks official publications from financial and crypto regulators. Stay informed, monitor regulatory changes and maintain structured intelligence over time.

Built for compliance teams, legal professionals and developers, and hosted in Europe, Seqlense DOC replaces fragmented manual processes with a unified, traceable and complete regulatory intelligence workflow.

**+130**

HOSTED IN EUROPE

### SOVEREIGNTY

100% in-house code, hosted in Europe. Your data never leaves EU infrastructure: no US Cloud Act exposure.

## How *Seqlense DOC* works

A structured regulatory intelligence workflow designed for traceability, completeness and long-term awareness of regulatory change.

---

### 01 Source collection

Official publications are continuously collected from regulatory and supervisory authorities across supported jurisdictions.

---

### 02 Document ingestion

Regulatory documents are ingested in their original formats (PDF, HTML, DOCX) and preserved without alteration.

---

### 03 Normalisation & indexing

Content is normalised, indexed and enriched with structured metadata: jurisdiction, authority, publication date and topic.

---

### 04 Change detection

New publications, updates and revisions are identified and tracked over time to ensure visibility into regulatory change.

---

### 05 Monitoring & search

Compliance and legal teams search, filter and monitor regulatory content through a unified interface or the API.

---

### 06 Traceability & history

All documents remain historically accessible, enabling audit, review and long-term regulatory intelligence.

## Who is *Seqlense DOC* for

For teams that require continuous visibility into regulatory publications and evolving compliance requirements.

### **Compliance & regulatory affairs**

Maintain awareness of regulatory changes and keep internal policies aligned with evolving frameworks.

### **Legal teams**

Track authoritative publications, guidelines and regulatory interpretations across multiple jurisdictions.

### **Risk & governance**

Support risk assessments and governance decisions with structured regulatory intelligence.

### **Financial & crypto institutions**

Monitor regulatory obligations across jurisdictions without relying on fragmented manual processes.

— COVERAGE

## Regulatory sources *covered*

Illustrative selection. SeqLense DOC covers 130+ jurisdictions (Italy, Netherlands, Belgium, Singapore, Dubai, Hong Kong, Cayman Islands...) and expands its sources continuously.

## Plug Seqlense DOC in via *MCP*

Seqlense DOC connects natively to your AI assistants and agents through an MCP (Model Context Protocol) server designed and maintained in-house. Your tools query regulatory watch, search and alerts in natural language, with no custom integration.

- **Dedicated MCP.** A server built specifically for Seqlense DOC.
- **Compatible agents.** Connect any MCP-compatible AI assistant.
- **Full access.** Documents, search and alerts exposed as tools.
- **Sovereignty.** Hosted in Europe, like the rest of the stack.

### NATIVE MCP

The Model Context Protocol standardises the connection between your AI agents and our data. Your compliance workflows reach Seqlense regulatory intelligence directly, within minutes.

## Get started

Schedule a demo, access technical documentation or receive a compliance assessment tailored to your jurisdiction.
